MISSOURI BOTANICAL GARDEN

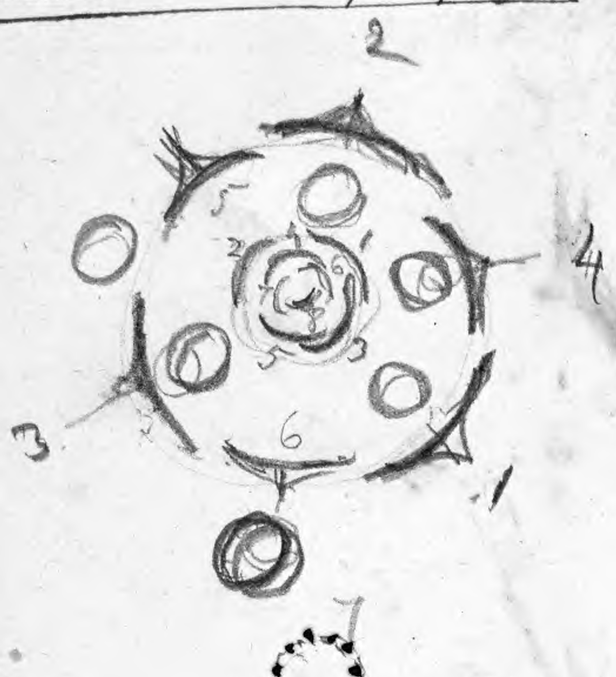
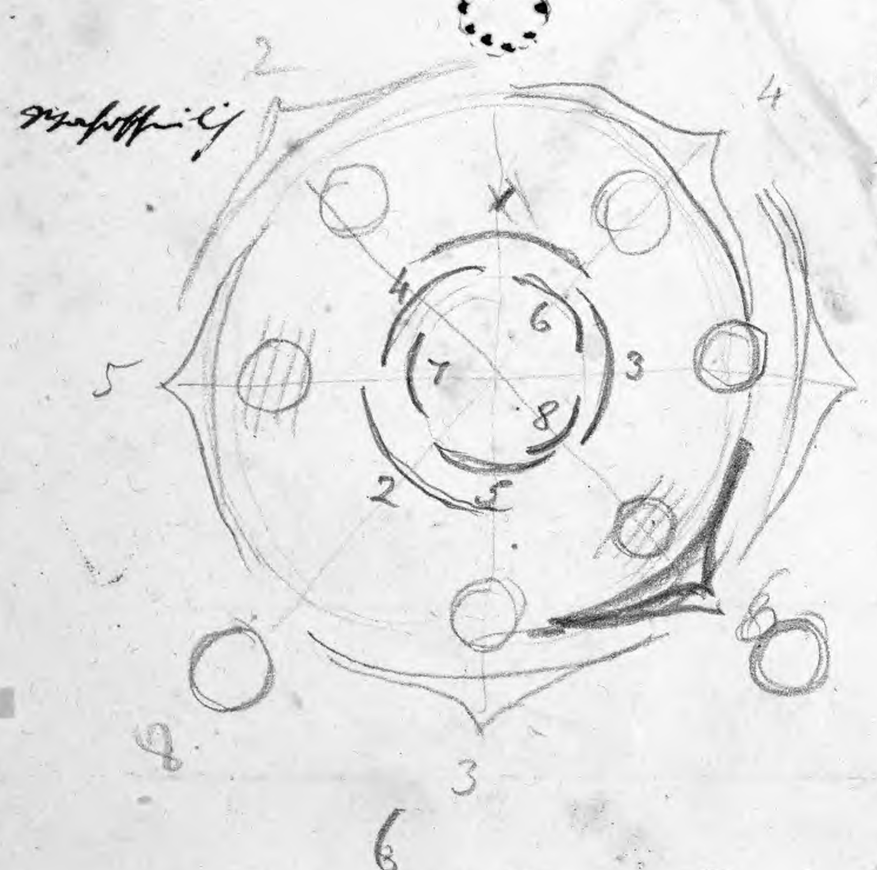
genaue Ansicht. — Salisburia adiantifolia — H. Bot. Garten Jul 28 1869

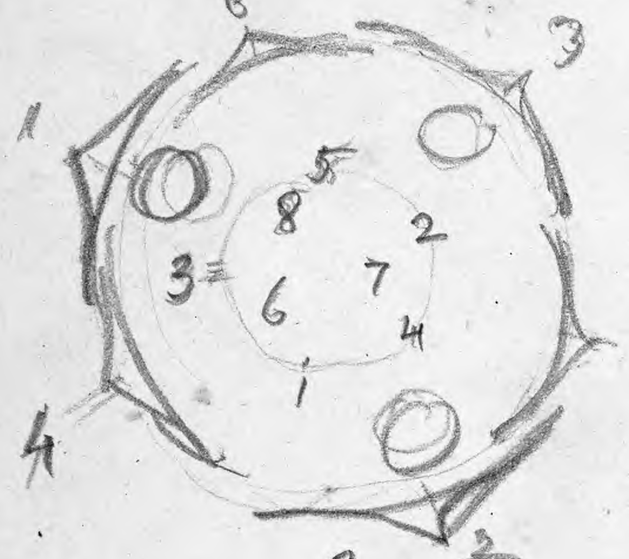


1 kurzgestielt = 9 klein
2 etwas länger gestielt = 9. etwas grösser
3 etwas so lang gestielt aber noch breiter
4 längergestielt = 9 breiter.
5 noch grösser = 9 breiter
6 lang gestielt = 9 spitzer

} fruchtzweig = Salisburia mit 6 Blättern = 9 6 fruchtstielen

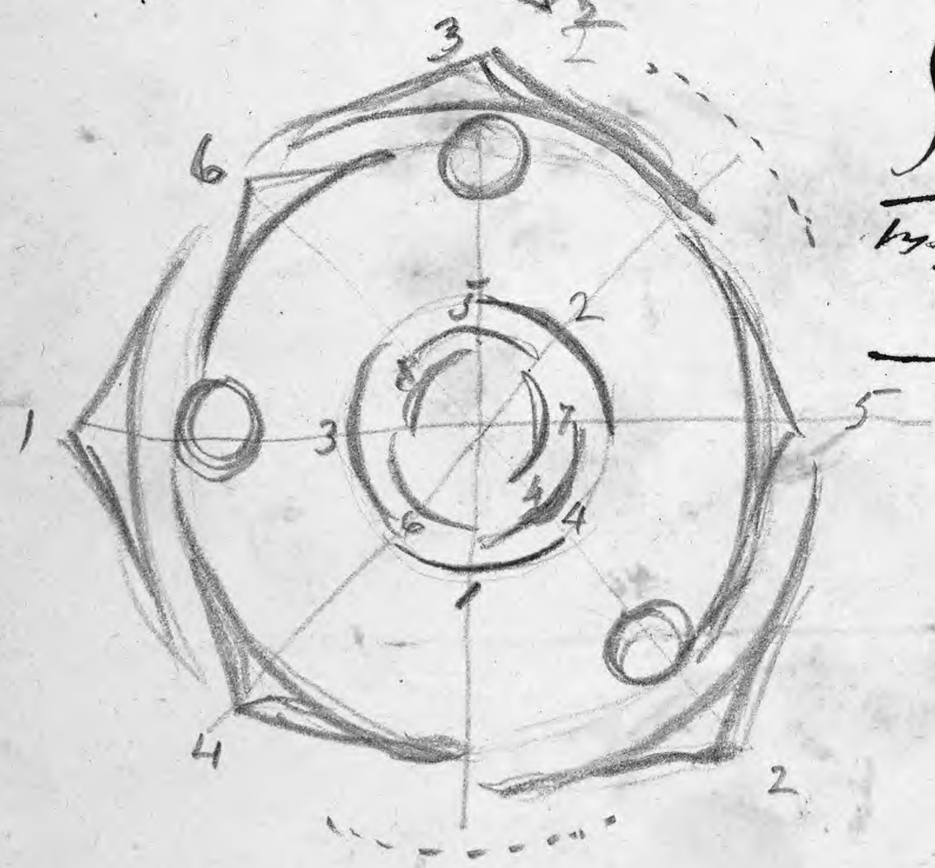


Grundrissliche Stellung in 3/8
Denn 8 Querschnitten
denen 6 Blättern, denen 4 äusseren
fruchtstiele tragen, 2 innen sterile
2 äusseren fruchtstiele entsprechen
den (abgefallenen) Querschnitten
einen fruchtstiel, 4 zu fruchtstielen



genaue Ansicht

1 sehr kurz gestielt
2 etwas länger } fruchtstiele in Achsel
3 noch länger = grösser
4 kaum länger gestielt als breit
5 lang gestielt = breit } sterile
6 lang gestielt = spitzer



Zeichnung

Zeichnung 1 = 5 = 9 gestielt 2 = 4
muss ein Blatt fehlen oder sehen wir Querschnitten
hier?

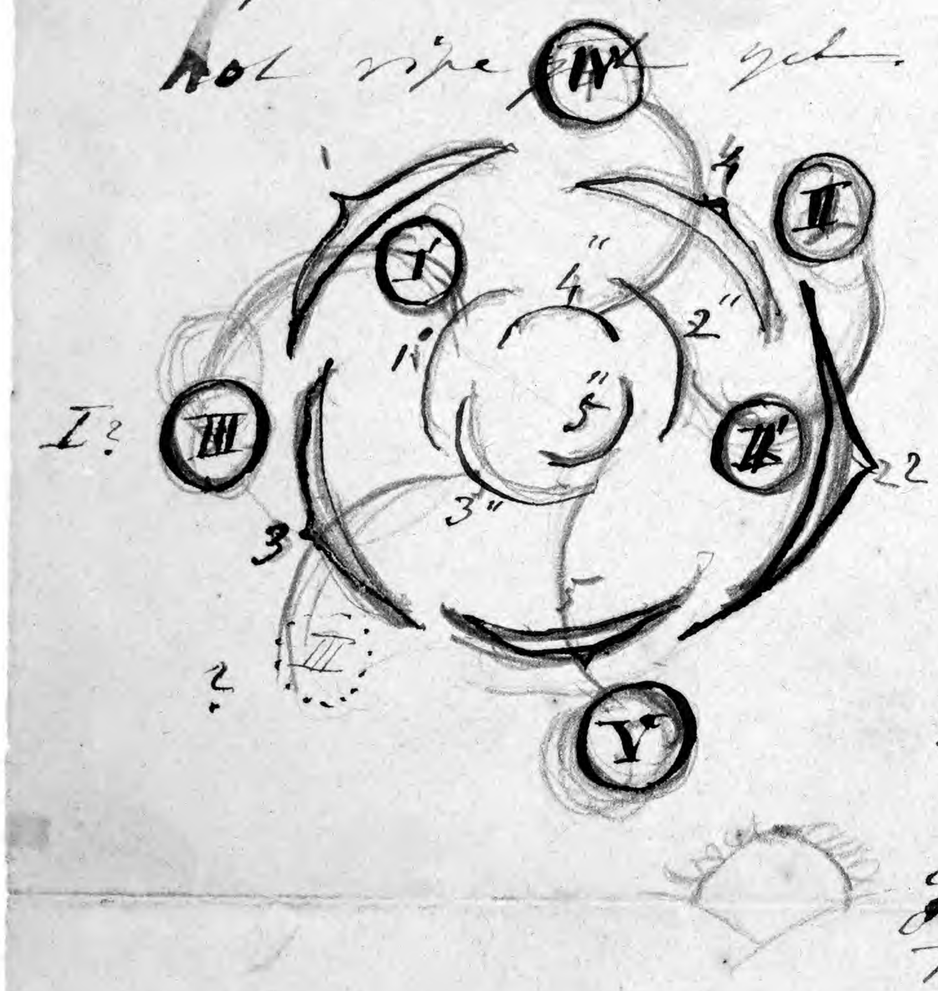
H Bot Windsor. July 17 1869

Salisburia adiantifolia

female graft on male tree, fertile, bears annually perfect seed

fruit on stunted branchlet,

branch before me 1 inch long with 5 leaves and 6 peduncules, each bearing ~~to~~ 3, usually 2 berries, not ripe yet.



branchlet with 5 leaves, 2d larger than first, following ones gradually smaller. fifth not half as large as second.

6 peduncules 2, the inner ones in the axils of first and 2d leaf; the 4 others outside of the leaves and no trace of fallen leaves under them visible.

A bud in the centre, of numerous green white fringed scales; transverse, the 5 outer ones in distinct quincunx but not exactly corresponding with the leaves rather oblique. — Pedunule III between leaves 3 and 5 may have been abortive and that I marked II between 1 and 3 may really be I, so that we would have 5 outer and 2 inner pedunules

How do the outer pedunules appear? from the axils of fallen leaves or of the innermost budscales?
